

# Privacy Policy

Application: **{{APP\_NAME}}** ({{PACKAGE\_NAME}})

Publisher: **{{COMPANY\_NAME}}**

This Privacy Policy explains how **{{COMPANY\_NAME}}** ("we", "us", or "our") handles information in connection with **{{APP\_NAME}}** (the "App" or "the game"), available through Google Play, Huawei AppGallery, the Amazon Appstore and other Android distribution channels. Please read it carefully. By installing or using the App you agree to the practices described below.

15. How to contact us

## 1. Summary

In short:

- **We do not run our own user-account backend.** The App has no sign-up, no login, and no profile. We do not transmit any personal data to servers we operate.
- **We do not collect** your name, email, phone number, contacts, photos, microphone, camera, files, or location.

- **The App displays advertising** using one or more of Google AdMob, AppLovin MAX, and Yandex Mobile Ads. These advertising providers process limited information (such as your device's advertising identifier and approximate device characteristics) to serve and measure ads. Their privacy practices are governed by their own privacy policies, linked in Section 4.
- **Some game content may be provided by content partners.** Where that is the case, our partners maintain their own privacy practices, summarised in Section 6.
- **The App requests only the** `INTERNET` **and** `ACCESS_NETWORK_STATE` **system permissions** (see Section 7).

## 2. Information we collect

### 2.1 Information you provide directly

None. The game has no registration, sign-in, contact form, chat feature, profile editor or other surface through which you would submit personal information to us.

### 2.2 Information we collect automatically

We do not operate analytics, crash-reporting, or telemetry services for the App. The App ships with a built-in list of advertising domains that is bundled into the application package; this list is used locally on your device to reduce in-game advertising trackers and is not fetched from any remote server at run time.

### 2.3 Information collected by third parties

Advertising providers integrated into the App (see Section 4) may automatically collect the following categories of information when an advertisement is requested or displayed:

- device identifiers (notably the resettable Android Advertising ID, "AAID");
- technical device information (model, operating-system version, language, time zone, screen size);
- coarse network information (IP address, mobile carrier);
- ad-interaction data (impressions, clicks, view-time);
- where lawful and where you have consented, approximate location derived from network signals.

Each provider is responsible for its own data processing. We do not receive a copy of this information.

### 3. How we use information

Because we do not collect personal information ourselves, we use it for no internal purpose. The App uses the limited information described above only as needed to:

- deliver the game experience to you;
- display advertisements through the third-party advertising providers identified below;
- reduce in-game advertising trackers using a publicly-curated list of advertising domains;
- persist a small number of local preferences on your device (for example, whether you have rated the App and timing data used to limit how often advertisements appear);
- open the device's app store when you choose to leave a rating;
- open promotional links you tap inside the App in your device's default browser.

### 4. Third-party services and SDKs

The App integrates the following third-party advertising SDKs. Each has its own privacy policy that governs how it processes data when it is active:

| SDK                           | PROVIDER             | PURPOSE                                           | PRIVACY POLICY                                                                    |
|-------------------------------|----------------------|---------------------------------------------------|-----------------------------------------------------------------------------------|
| Google Mobile Ads SDK (AdMob) | Google LLC           | Banner, interstitial and rewarded advertisements. | <a href="https://policies.google.com/privacy">policies.google.com/privacy</a>     |
| AppLovin MAX SDK              | AppLovin Corporation | Banner, interstitial and rewarded advertisements. | <a href="https://applovin.com/privacy">applovin.com/privacy</a>                   |
| Yandex Mobile Ads SDK         | YANDEX LLC           | Banner, interstitial and                          | <a href="https://yandex.com/legal/confidential">yandex.com/legal/confidential</a> |

rewarded  
advertisements.

Only one of the above advertising SDKs is initialised in any given build. The active provider is chosen at build time; the others remain inactive at run time.

We do not embed analytics SDKs (such as Firebase Analytics, Google Analytics for Firebase, Adjust or AppsFlyer), social-network SDKs, attribution SDKs, or push-messaging SDKs in the App.

## 5. Advertising and advertising identifiers

### 5.1 Advertising identifier (AAID)

Advertisements served inside the App rely on the *Android Advertising ID* (also called "AAID" or "GAID") issued by your operating system. The AAID is a resettable, user-controlled identifier that you can reset or block at any time from your device settings:

- **Google Play services:** Settings → Google → Ads → "Reset advertising ID" / "Delete advertising ID".
- **Huawei devices:** Settings → Huawei Mobile Services (or Settings → Privacy → Ads) → "Reset Ad ID".
- **Amazon Fire devices:** Settings → Apps & Notifications → Amazon Application Settings → Advertising ID.

Resetting your advertising ID prevents previous activity from being associated with your new identifier; deleting it prevents personalised advertising entirely.

### 5.2 Personalised vs. non-personalised advertisements

Where required by applicable law (notably in the European Economic Area, the United Kingdom and Switzerland), advertising providers ask for your consent through a Consent Management Platform. If you decline personalisation the providers will continue to serve advertisements but will use only contextual or non-personalised targeting, in line with the IAB Transparency & Consent Framework (TCF v2).

### 5.3 California residents (CCPA / CPRA)

Some sharing of identifiers with advertising providers may constitute "sharing for cross-context behavioural advertising" under the California Consumer Privacy Act, as amended by the California Privacy Rights Act. Each integrated provider honours a "do-not-sell-or-share" signal where applicable. You can also exercise your CCPA rights by contacting us at the address in Section 15.

## 6. Third-party content partners

Certain features of the game and certain game updates may be provided through third-party content partners. Where this is the case, our partners operate independently of us and maintain their own privacy practices, which we do not control. When you interact with content provided by such a partner, that partner may set its own preferences on your device and may make network requests to its own services. Many third-party advertising and tracking requests originating from such content are blocked by the App's built-in domain blocker before they reach the network, but we cannot guarantee that every request is blocked.

## 7. Android permissions

The App declares only the following permissions:

| PERMISSION                                           | WHY WE NEED IT                                                                                                                   |
|------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| <code>android.permission.INTERNET</code>             | To deliver the game experience and to allow the integrated advertising SDK to fetch and display advertisements.                  |
| <code>android.permission.ACCESS_NETWORK_STATE</code> | To detect whether the device is online before starting the game, and to display a "no internet connection" message when offline. |

We do **not** request location, microphone, camera, contacts, calendar, SMS, call log, telephony, storage or any device-administrator permission. The integrated advertising SDKs may declare additional permissions (such as `com.google.android.gms.permission.AD_ID`), which are merged automatically into

the application package by the build system; those permissions are used only by the SDKs and only for the purposes described in their own privacy policies.

## 8. Local storage

The App stores small amounts of information on your device only. None of this information is transmitted to us:

- **App preferences:** whether you have rated the App, the time of the most recent rating prompt, timestamps used to enforce a minimum interval between advertisements, and similar non-personal flags.
- **In-game progress:** small preferences saved to your device by the game itself so that your progress is remembered between sessions.
- **Cache:** standard temporary files used by the operating system to avoid re-downloading unchanged game assets.

All of the above can be cleared at any time from your device's Settings → Apps → {{APP\_NAME}} → Storage & cache → "Clear data".

## 9. Children's privacy

The App is not directed to children under the age of 13 (or the applicable age of digital consent in your jurisdiction, which may be higher). We do not knowingly collect personal information from children. If you believe a child has provided personal information to us, please contact us using the details in Section 15 and we will take steps to delete that information.

Where required by applicable child-privacy law (including the United States Children's Online Privacy Protection Act, "COPPA", and the European General Data Protection Regulation as it applies to minors), the integrated advertising SDKs are configured to operate in a child-aware mode that disables personalised advertising for applicable users.

## 10. International data transfers

The integrated advertising SDKs are operated by international companies and may transfer information outside your country of residence, including to the United States, the European Union, the Russian Federation, and other jurisdictions where their service

providers are located. Each provider is responsible for ensuring an adequate level of protection in accordance with its own privacy policy, including, where applicable, by relying on the European Commission's Standard Contractual Clauses or equivalent transfer mechanisms.

## 11. Your rights (GDPR, UK GDPR, CCPA)

Depending on where you live, you may have the following rights under the EU General Data Protection Regulation, the UK GDPR, the California Consumer Privacy Act (as amended by the California Privacy Rights Act), and similar privacy laws:

- the right to access personal data we hold about you;
- the right to correct inaccurate personal data;
- the right to delete personal data ("right to be forgotten");
- the right to restrict or object to certain processing;
- the right to receive a portable copy of your personal data;
- the right to withdraw consent for processing based on consent;
- the right to opt out of "sale" or "sharing" of personal information for cross-context behavioural advertising;
- the right to lodge a complaint with a supervisory authority.

Because we do not collect personal information directly, most of these rights must be exercised against the third-party advertising providers rather than against us. To exercise a right against a provider, please use the contact details in that provider's privacy policy (linked in Section 4). To exercise a right against us, or for any other privacy enquiry, contact us at {{CONTACT\_EMAIL}}.

## 12. Data retention

We do not store personal data on our own systems. Locally-stored app preferences remain on your device until you uninstall the App or clear its data through your device settings. Information processed by third-party advertising providers is retained according to those providers' own retention policies, which are described in their privacy policies.

## 13. Security

All network connections initiated by the App are made over HTTPS. Cleartext HTTP traffic is disabled at the manifest level. No security measure is perfect; you remain responsible for the security of the device on which the App is installed.

## 14. Changes to this Privacy Policy

We may update this Privacy Policy from time to time, for example to reflect changes to the App, to the third-party SDKs we use, or to applicable law. The "Effective date" at the top of this document indicates when the most recent version took effect. For material changes we will, where reasonably practical, post a prominent notice inside the App or on {{WEBSITE\_URL}} before the change takes effect. Continued use of the App after the effective date constitutes acceptance of the revised policy.

## 15. How to contact us

For privacy-related questions or to exercise any of your rights, you can contact us at:

**{{COMPANY\_NAME}}**

{{COMPANY\_ADDRESS}}

Email: {{CONTACT\_EMAIL}}

Website: {{WEBSITE\_URL}}

This Privacy Policy is governed by the laws of {{JURISDICTION}}, without regard to its conflict-of-laws rules. Where applicable consumer-protection or data-protection law of your country of residence provides stronger protections, those protections apply in addition to this policy.
